

# Boozt

## To whom it may concern

Boozt AB has since January 2017 been using JCommerce for dedicated development of mission critical business systems based on PHP/Symfony2. The developers from JCommerce have been offering an excellent service to our full satisfaction, and have all been highly skilled and well communicating although the assignments have been very complicated and ambitious. JCommerce has been a professional and flexible partner with a full understanding of our requirements and priorities.

Malmö, July 27 2017,

  
Jesper Brøndum  
CTO, Boozt AB
