**Letter of recommendation**

CORE is one of Germany's leading IT-management consultancies specializing in IT-transformation strategies, providing services across the international market. In July 2016 we were looking for a nearshore partner that could develop a dedicated software for one of our clients.

We decided upon JCommerce for the expert technical skills of their developers, professionalism, motivation, and swift response times.

Positive results of their knowledge transfer period convinced us to establish a long term cooperation in a team leasing model. The scope of the project was to create a dedicated solution for a complex *greenfield* system. The first team consisted of a project coordinator/SCRUM master, a solution architect, a business analyst, a front-end specialist, Java programmers, and testers. After more than half a year of cooperation we were fully satisfied and decided to prolong our cooperation.

It has to be outlined that the collaboration between JCommerce and CORE started with a team of 6 developers dedicated to the project, and has since scaled-up to 30. The JCommerce team supports the project remotely from their offices based in Poland.

We highly recommend JCommerce IT outsourcing services. Working with such a professional and dedicated team is a pleasure.
